DesignaKnit 9

...and the Brother Stitch World patterns

Some improvements have been made in the presentation of the Brother Stitch World patterns that were installed with DesignaKnit 8 into the Stitch patterns / Brother / StitchWorld folder. In DesignaKnit 9, the following additions and changes have been made.

- Patterns 99 to 102 were not included with DesignaKnit 8 and have now been added as Fair Isle.
- Patterns 43 to 102 are multicoloured Fair Isle and single motif patterns - these were previously in only 2 colours (grey and white) but now have roughly the same yarn colours as in the Stitch World book.
- Pattern 84 was previously a copy of 83 but is now included correctly.
- Patterns 103 to 222 are separated lace patterns and have not been included. They might be added in an unseparated form at a later date.
- Patterns 223 to 292 are single colour tuck patterns that previously had the Fair Isle knitting method with the tuck stitches marked as a non-selecting colour. They are now method R and the patterns are marked using the Tuck symbols on a pale blue-grey background.
- Patterns 293 to 312 are multicolour tuck patterns that previously had the Fair Isle knitting method (with the tuck stitches marked as a non-selecting colour). They are now method R and the patterns are marked using the Tuck symbols on roughly the same coloured yarns as in the Stitch World book.
- Patterns 313 to 322 are plaited tuck patterns that previously had the Fair Isle knitting method with the tuck stitches marked as a non-selecting colour. They are now method R and the patterns are marked with the Tuck symbol on a pale blue-grey background.
- Patterns 323 to 367 are single colour slip patterns that previously had the Fair Isle knitting method with the slip stitches marked as a non-selecting colour. They are now method R and the patterns are marked using the Slip symbol on a pale green background.
- Patterns 368 to 394 are multicolour slip patterns that previously had the Fair Isle knitting method with the slip stitches marked as

a non-selecting colour. They are now Right facing texture patterns. Patterns 386, 388, and 390-394 are now presented in two separate forms. One is the normal Stitch World pattern, suitable for knitting on a single bed. The other has a letter J at the end of the number and is presented as an unseparated 3-colour or 4-colour Jacquard pattern which can be knitted on either a single or double bed.

- Patterns 395 to 421 are thread lace patterns that previously had the Fair Isle knitting method. They are now method W, and needle selection is now marked using the Thread Lace symbol on a pale pink background.
- Patterns 422 to 426 are weave patterns that previously had the Fair Isle knitting method. They are now method W, and needle selection is now marked using just the Weave Over symbol on a pale purple background.
- Patterns 467 to 511 and 532 to 555 are garter carriage patterns that previously had the Fair Isle knitting method. They now have the W method and the needle selection is marked using the Knit and Purl symbols on a cream background.
- Patterns 512 to 521 are multicolour Fair Isle patterns that were already presented as Fair Isle. They now have roughly the same yarn colours as shown in the Stitch World book.
- Patterns 522 to 531 are multicolour 2-colour Jacquard patterns that previously had the Fair Isle knitting method.
- Patterns 801 to 840 from Stitch World II have been added as Fair Isle.
- Patterns 841 to 850 from Stitch World II have been added as Jacquard. The Stitch World book shows them knitted double length: doubling is necessary in order to avoid Jacquard (yarn sequence) errors. The stitch patterns themselves have now been doubled.
- Patterns 851 to 860 from Stitch World II have been added as Jacquard. The detail in some patterns has also been altered very slightly in order to avoid Jacquard errors. (To avoid errors, Brother specified the yarn sequence varying from row pair to row pair, but DesignaKnit doesn't yet allow for that).
- Many of the Stitch World patterns previously had opaque stitch symbols with no symbols transparent. Yarn transparencies have also been changed for some patterns.
